### TEMPEST AND ELECTROAIR SPONSOR JULIE CLARK AT SUN-N-FUN

LAKELAND, FL - Tempest Plus Marketing Group and Electroair are pleased to announce that they will jointly support Julie Clark Air Shows for her performances at the 2015 Sun-n-Fun Fly-In.

Julie Clark Air Shows features Julie flying her beautifully restored and polished T-34 in a graceful and powerful aerial ballet as a patriotic tribute to our veterans and current troops working to keep our freedom intact. Julie's serenade in "Red, White and Blue" is flown and choreographed to Lee Greenwood's famous song "God Bless the USA". Clark will perform during the Warbird Show at Sun-n-Fun on April 22.

"I'm really excited about our partnership with Tempest and Electroair," said Julie Clark. "After many years of flying my original Beechcraft T-34 in air shows (35+ years), I'm real excited about this new adventure, and flying with the state-of-the-art modern electronic ignition by Electroair coupled with Tempest high-energy spark plugs. I think this will definitely add "spark" to my airshow performance!"

"Julie is an icon in the aerobatic community and loved by fans all over the world," said John Herman, president of Tempest. "The grace and beauty of her performance is surpassed only by Julie's dedication to perfection. Tempest is extremely proud that Julie has chosen Tempest as her official brand of spark plugs and oil filter. We look forward to a long and exciting partnership with Julie."

"Electroair is proud to be a sponsor of Julie Clark and Julie Clark Air Shows," said Michael Kobylik, of Electroair. "It's a great match, because, like Julie's fantastic showmanship, our electric ignition systems provide top-quality performance."

Electroair, Inc., produces high-quality aircraft electronic ignition systems for single and multiengine piston aircraft. Its ignition systems lead to a 10 to 15 percent fuel savings, smoother engine operation, longer spark plug life, and reduced maintenance costs. For more information, visit the [website](#) or follow Electroair on [Facebook](#).

The introduction of Tempest oil filters in 2004 complimented the Aero/Tempest legacy product line of OEM pneumatic systems and electrical components produced since 1984. In 2009, addition of the Tempest Spark Plug broadened that product range. Tempest oil filter and spark plug designs are the technology leaders of the industry today. OEMs, maintenance shops, and aerobatic performers worldwide choose Tempest, making it the fastest growing brand of aviation spark plugs and oil filters in the industry. OEMs such as Continental Motors, Robinson Helicopter, Cirrus, and others have chosen Tempest as their supplier of choice for spark plugs and oil filters.
